-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species I: Species A1: electrode is a cathode
Species B1: electrode is an anode
- Species II: Species A2: anode is a vacuum chamber wall or shield
Species B2: anode is a rotatable cylindrical tube
Species C2: anode is a rotatable brush
- Species III: Species A3: device is intermittently in relative motion
Species B3: device is continuously in relative motion
- Species IV: Species A4: device is intermittently in contact with said electrode
Species B4: device is continuously in contact with said electrode

Applicant is required, in reply to this action, to elect a single species (A1 or B1 **AND** A2 or B2 or C2 **AND** A3 or B3 **AND** A4 or B4) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added.

Art Unit: 1795

An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species A1 (Species I): claim 4

Species B1 (Species I): claim 6

Species A2 (Species II): claim 7

Species B2 (Species II): claim 8

Species C2 (Species II): claim 9

Species A3 (Species III): claims 14 and 16

Species B3 (Species III): claims 15 and 17

Species A4 (Species IV): claims 14-15

Species B4 (Species IV): claims 16-17

The following claim(s) are generic: claims 4 and 6; claims 7-9; claims 14-15; claims 16-17.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The common technical feature unifying Groups I-IV is a sputtering deposition process having a vacuum, an electrode, a substrate, and a device for removing or applying material to said electrode. These features are well known in the art and are disclosed in the prior art documents such as US Patent No. 7,014,741. Hence there are no special technical features and therefore unity is lacking.
